
It's a new day dawning

a placid glow appears
in the east
pulsing with a
promising newness,
gold glory that
grows . . .

two
witness its
coming — the
new day dawning —
and stand, alone,
on a cold stretch
of beach . . .
the chill passes
the birds awake
the waves come to life
and with a
sudden burst of
bloody boldness
the sun appears —
in awe, they
whisper among themselves
of the days to come —
a journey into tomorrow
that's hidden by
evening's shadows —
the rising sun dispels
the grey, though,
lifting the mists that
shroud the morn
to reveal a
windswept path
climbing through
the sand dunes —
as ancient as the
sun, itself,
as young
as the new day dawning . . .

If you think SEALED POWER makes
PISTON RINGS
. . . you're partly right.

Sure, we make piston rings -- millions every week. But that is only part of our expanding business. Sealed Power manufactures or distributes many other engine parts -- pistons -- cylinder sleeves, miscellaneous castings -- valves -- valve springs -- valve guides -- water pumps -- tappets -- bearings -- die cast components -- powdered metal items -- auto air conditioning parts -- to mention a few. With headquarters in Muskegon, plants from Canada to Mexico, and worldwide distribution, Sealed Power's name is well recognized.

To meet the challenge of modern industry, Sealed Power needs able employees in all phases of our operation. Whether you plan to continue your education or seek immediate employment, may we offer --

continuing its arched journey
across clear — sometimes cloudy — skies
it reaches its zenith, ablaze with
the fever of noon,
only to descend — ever so slowly —
retracting its groping, fingering rays
to retreat to some distant horizon
yet, it fears not, to die proudly
for in its last waking hours
it bravely streams 'cross hills and waves
in vibrant farewell hues
of bronze and golden splendor
the mists of dusk, though, descend
to reclaim their shores
concealing sandy beaches and
whispering, knee-high grass in its
nebulous grip,
drowning all in pearls of dew.

advancing shadows of night
emerge to bar the paths —
reaching and stretching, they creep
along to submerge the once-warmed
foliage into darkness
the earth shudders, for but a moment,
from the cold hand of evening
then surrenders its keeping
to the night
the sun, too, yields to the
power of darkness,
dousing its radiance in obscurity —
the twilight — dissolves,
becoming with the darkness —
the silhouettes of two
melt into the shadows —
and all is still . . .
but even in the still of night
the growing pains of another day
are felt in the tumble of the wind —
for out of that darkness
the hush of the heavens
will burst with the glory
of a new day dawning . . .

this year's compass points would like to extend its thanks to the following people and businesses: roy burch, lowell kinney, paul mulder, harry sabourin, the camera shop, norton examiner, and radium.

we would also like to give a special thanks to our american yearbook representative, john pesano, for all of his time and help.
